

ALL NEW!

# Premier Closet Mirror

In a space no wider than a jacket hung on a hanger, our latest mirror's design takes up less than half the stored width of our original Closet Mirror at a modest *two inches!* It's as beautiful and functional as our original Closet Mirror – but it's so much better! You can *hide* it with its super skinny profile. Then you can guide it out into use. And finally, you can spy your favorite clothes in it. After all, if you can't see it, you won't wear it!
