

## FOR IMMEDIATE RELEASE

### JULY 8, 2010: Sidelines Introduces Professional Series Pull-Out Pantry Rack for 14" Deep Pantry Cabinetry

The beauty of our new pantry rack is the ease with which the chef can find his or her staple items. No craning the neck to see what's at the back of the shelf! No pulling out a stack of items (creating a new mess!) to reach what's hiding in the rear.

Did you just buy one of those oversized boxes from Costco that doesn't usually fit on a shelf? Now you can quickly and easily change the basket height in the rack to accommodate new purchases.

Fitting standard 14-inch deep pantry sections, our adjustable height tall rack glides in and out of 18-inch wide cabinetry sections (or wider) on full-extension, soft-closing, ball-bearing steel slides. Five heavy-gauge, chrome-plated steel baskets fit on the powder-coated steel frame. And our easy installation allows the option for mounting the cabinet door face to the frame or leaving it open to view.

- Fits 14" + deep pantry sections
- Min. 18" wide section
- Full-extension, soft-closing, ball-bearing steel slides
- 5-Heavy gauge, chrome-plated steel baskets
- Powder-coated steel frame

To learn more details about this and all our 14"
